 $\mathbf{E}$ 

In the first half of 2024, the Company achieved remarkable results in various aspects of technology innovation, including implementation of technology research and development projects, construction and operation of technology platform and application and licensing of intellectual property.

- 1. Provincial science and rechnology projects: 8 of our projects were admitted by he Hebei Provincial Department of Housing and Urban-Rural Development as construction rechnology projects, 15 of our projects were admitted as new rechnology application demonstration projects, and 5 of our projects were admitted by Hebei Construction Industry Association as rechnology projects in 2024.
- 2. Enterprise level science and technology projects: in 2023, we incurred research and development expenses of RMB388 million for 359 enterprise level science and technology projects. In the first half of 2024, we initiated 213 enterprise level research and development projects and carried out research and development activities in an orderly manner.
- 3. Technology progress and awards: one of our project received 2023 Hebei Science and Technology Cooperation Award (Professor Cheng Shuiping of Tongji University), 28 of our projects received the Scientific and Technological Progress Awards for construction industry in Hebei Province in 2024, including 3 first-class awards; 15 new technology application demonstration projects, one green construction technology demonstration project and 4 technology research and development plan projects passed the accept ance inspection by the Hebei Provincial Department of Housing and Urban-Rural Development, and 10 achievements were assessed to be at an advanced level in China.
- 4. Construction and operation of technology platform: we exclusively approved as the postgraduate works at ion for the construction industry in Hebei Province, carried out platform construction and operation with increased efforts, completed the relevant data reporting for national enterprise technology center, summarized and submitted the performance evaluation materials for the 2023 provincial technology innovation center of technology innovation center, and the assessment for admission and graduation of the postdoctoral works at ions were carried out in an orderly manner.
- 5. In elled ual property: we parented our key technologies in a timely manner. As of the end of June 2024, we obtained 70 new parents (including 4 invention parents), and submitted 32 parent applications.

In the first half of 2024, under the hard work of all our cadres and employees, the Company achieved steady development in all its businesses. Firstly, most of the units are operating smoothly, with plans and measures in place to achieve the annual economic targets. Secondly, the quality and scale of the projects under taken by the Group in the market have steadily increased compared to the corresponding period of last year.

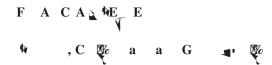

In the coming period, the Group as a whole will focus on solidly improving organizational construction and various system works, continuously improving its cash flow adequacy, so as to smoothly tide over the economic cycle, and embark on a new journey owards steady and long term development.

Firstly, the Group will continue to develop existing regional and industrial markets by encouraging competition among companies. Relying on the regional organizations widely distributed across counties, districts, and cities in Hebei Province and all provinces and cities across the country, the Group obtains constant market information and accumulates ever-changing market resources, while adhering to stringent market undertaking requirements to ensure that high-quality projects are undertaken.

Secondly, the Group will strongly advocate for innovative and entrepreneurial organizations to explore new fields in the upstream and downstream industries. The Company encourages organizations at all levels and employees to leverage the broad platform of the Group, take advantage of government preferential policies, give full play to their own intelligence, resources and expertise to carry out innovation and entrepreneurship around the upstream and downstream industries, as well as also provide convenience and policy support for organizations and individuals who are brave enough to break out of their comfort zones. In particular, the Group fully supports young talents in leveraging their learning abilities and creativity on the Company's broad platform, through new perspectives, knowledge, and methods to identify market needs, solve "key-point" problems of customers, boldly become innovators and take the lead in innovation.

Thirdly, it is important to maintain a constant focus on safety and continuously improve the quality of project delivery. We will continue to effectively implement safety production standardization and VIS image construction at the construction site, actively build high-quality projects at all levels, and strive for projects that satisfy the basic conditions for excellence and applying for awards. In particular, we endeavour to cherish each opportunity to apply for awards outside the Hebei province in order to enhance our capabilities and brand awareness.

In the second half of the year, the Company will continue to uphold the work principles of "Improving Qualty and Efficiency, and Achieving Stability for Sustainable Development", wholeheartedly focus on development, and deliver excellent performance to serve the society, reward our Shareholders and benefit our employees!

The revenue for the six months ended 30 June 2024 amounted to RMB11,015 million, representing a decrease of approximately RMB3,933 million as compared with the corresponding period of last year, which was mainly due to the decrease in segment revenue from construction contracting of RMB3,894 million.

The revenue from construction contracting business for the six months ended 30 June 2024 decreased by RMB3,894 million, which was mainly due to the decrease in the newly undertaken projects of the Group as compared to the same period of last year.

The change in revenue from construction contracting segment is analyzed as follows:

- (1) For building construction business, being the largest revenue contributor to construction contracting business, during the Reporting Period, affected by the macro-economic situation, the property market remained in the doldrums, with a decrease in new projects and a slowdown in construction progress. As a result, revenue from the building construction business decreased by RMB2,446 million as compared to the same period of last year;
- (2) The revenue from infrastructure construction business decreased by RMB1,010 million as compared to the same period of last year, which was mainly due to the slowdown in the growth rate of infrastructure investment and the decrease in new contract value as compared to the same period of last year;

(3) In the first half of 2024, the revenue from specialized and of her construction business decreased by RMB438 million as compared to the same period of last year. Such business mainly includes mechanical and electrical installation and steel structure, which has a shorter construction period. The number of new projects of specialized and of her construction business secured during the Reporting Period was lower than that of the first half of 2023, resulting in lower revenue as compared to the same period of last year.

## а D 🜠 Ер

The selling and distribution expenses for January to June 2024 amounted to RMB0.97 million, representing a slight increase as compared to the same period of last year.

## G aa A Walk Ep

In the first half of 2024, the Group's general and administrative expenses amounted to RMB212 million, representing a decrease of RMB67.57 million as compared to the same period in 2023, which was mainly attributable to the decrease in employee benefits, welfare and social insurance fees in the current period.

## ♥ a a D p ÆEp

The research and development expenses of the Group for the first half of 2024 amounted to RMB33.22 million, representing a decrease of RMB36.10 million as compared to the corresponding period of 2023. The research and development expenses are mainly the costs incurred for research of special projects or production process by the Group, including the cost of materials utilised and salary of senior engineers involved in research and development. The decrease in research and development expenses was mainly due to fewer new research and development projects during the Reporting Period.

## pa C Zo

Impairment losses of credit losses for January to June 2024 amount ed to RMB76.76 million, representing a decrease of RMB10.28 million as compared to the same period of 2023, which was mainly due to the decrease in individual bad debt provision for customers with significant risk of default in the current period based on the Group's assessment on customer's operating conditions and payment collection.

The reversal of impairment losses on assets for January to June 2024 amount ed to RMB36.78 million, as compared to the reversal of impairment losses on assets of RMB9.67 million incurred in the same period of 2023, which was mainly due to the decrease in revenue in the current period, resulting in a decrease in

The investment losses for January to June 2024 amounted to RMB1.90 million, as compared to the investment losses of RMB8.38 million for the same period of 2023, which was mainly due to the decrease in long term equity investments loss under the equity method as compared to the same period of last year.

#### а Ер

The income \*ax expenses for January \*o June 2024 amount ed \*o RMB35.09 million, representing a decrease of RMB10.69 million as compared \*o \*he same period of last year, which was mainly due \*o \*he utilisation of unrecognised deductible \*ax losses by some subsidiaries in \*he current period, resulting in a decrease in income \*ax expenses for \*he current period as compared \*o \*he previous period.

Based on the above factors, not profit for the first half of 2024 was RMB121 million, representing an increase of approximately RMB9.69 million as compared with the same period of last year.

The informal ion related to performance obligations of the Group is as follows:

The performance obligation is fulfilled within the time when the service is provided, and the contract price is usually seltled within 90 days after the project payment is invoiced. Generally, the customer retains a certain percentage as the warranty money. The warranty money is usually seltled after the warranty period expires, because according to the contract, the Group's right to receive the final payment depends on the customer's satisfaction with the service quality over a period of time.

a

The performance obligation is fulfilled when the goods is delivered to the customer. For recurring customers, the contract price is usually settled within 90 days of delivery; for new customers, advance payment is usually required.

The performance obligation is fulfilled within the period of provision of relevant services. The contract period for sewage and reclaimed water treatment is 25 years. The contract price is normally paid within 90 days after settlement.
